Applicant's election without traverse of Group IX (claims 56-66) in Paper No. 7 is acknowledged.

Claims 65 and 66 are objected to under 37 CFR 1.75© as being in improper form because a multiple dependent claim cannot depend on another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 56-64 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Applicant does not clearly teach what is encompassed by “liquefying enzyme,” “saccharogenic enzyme,” amounts employed or conditions utilized.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Shimamura et al disclose a process for the production of alcoholic beverages using koji, malt, and various fermentation media (see entire patent).

Takeda disclose a process of brewing an alcoholic beverage from rice (see entire patent).
